

SURVEY SERVICES

Endpoint Solutions provides Professional Land Surveyor (PLS) services for residential, commercial and industrial surveys including pre-construction/design and existing conditions, topographic, infrastructure and utility data collection and mapping, floodplain certificates, wetland boundary, certified survey maps (CSM), American Land Title Association (ALTA), subdivision & condo plats, plats of survey, land divisions and construction staking.

DESIGN SERVICES

Endpoint Solutions has the expertise and capabilities to accurately and efficiently collect all of the necessary field data in order to create complete design packages. Using our expertise and software solutions in conjunction with our civil engineers, Endpoint can generate full design packages for residential, commercial and industrial development projects. Our 3D rendering capabilities allow us to not only design for function, but also ensure that the designed improvements can be constructed. Once design is complete, Endpoint services throughout construction and prepare record drawings.

SURVEY CAPABILITIES

- American Land Title Association (ALTA)/ National Society of Professional Surveyors (NSPS) Land Title Surveys
- Certified Survey Maps (CSM)
- Subdivision & Condo Plats
- Plats-of-Survey
- Land Divisions
- Topographic Maps
- Floodplain Certificates
- Wetland Boundary Surveys
- Construction Staking
- Utility Layout and Record Drawings
- Laser Scanning
- GIS Data Collection
- Drone Mapping Services

SURVEY EQUIPMENT

- Real-Time Kinematics (RTK) Global Positioning System (GPS) receivers
- Robotic Total Stations (RTS)
- RTK Mavic 3 Enterprise Drone

SOFTWARE

- Pix 4D Survey
- Pix 4D Matic
- Civil 3D
- Vehicle Tracking
- NavisWorks Manage
- ReCap Pro
- HydroCAD
- AutoCAD Plant 3D
- Watershed Analysis
- AutoCAD Plant 3D
- Trimble TerraFlex
- Clearedge 3D EdgeWise
